PEAS

PROTEAN EMAIL & ATTACHMENT SYSTEM | CAPABILITIES STATEMENT

Your business already has the information. PEAS helps you put it to work.

PEAS helps small and medium-sized businesses turn everyday business emails and attachments into organized, accessible information - reducing manual work today and creating a foundation for smarter business decisions tomorrow.

01 AUTOMATION

Capture once. Organize automatically.

Automatically capture and route email text and attachments from connected business email accounts into designated storage. Reduce manual downloading, filing, duplicate work, and unnecessary internal forwarding.

02 ACCESSIBILITY

Business knowledge stays with the business.

Give authorized employees and leadership direct access to shared documents. Improve collaboration, reduce dependence on individual inboxes, and retain institutional knowledge when staff change roles or leave.

03 AFFORDABILITY

Practical capabilities without enterprise complexity.

Works with Gmail, Google Workspace, Outlook, Microsoft 365. Start with essential automation and expand as needed, without adopting a large ERP, SCM, CRM, accounting, expense & spend, billing, or recruiting platforms.

04 INTELLIGENCE

Turn communications into actionable insight.

Planned capabilities include searchable metadata, optional naming standards, audit trails, and dashboards tracking quotes, orders, resumes, vendor proposals, and other activity. Analyze customer histories and identify potential sales and service opportunities.

WHO PEAS SERVES

Small and medium-sized businesses with document-heavy workflows, including professional services, staffing, finance, operations, and other teams that depend on email to exchange business-critical information.

AUTOMATE THE WORK. ACCESS THE KNOWLEDGE. UNLOCK THE INTELLIGENCE. AFFORD THE ADVANTAGE.

Capabilities note: Automated capture and filing form the current PEAS foundation. Advanced classification, analytics, customer profiling, and reporting are planned enhancements. Access is limited to connected accounts and authorized users.
